Murad Shahbazov

Full Stack Developer

👤 Profile

Full Stack Web Developer with a strong grasp of modern web technologies. My personal projects reflect a deep understanding of both front-end and back-end development. Skilled in problem-solving and known for a detail-oriented approach, I'm dedicated to delivering high-quality web solutions.

🎓 Education

Uniwersytet Łódzki - Studium Jezyka Polskiego dla Cudzoziemcow, Łódź

2017 — 2018

Bachelor of Computer Science, Wroclaw University of Science and Technology, Wroclaw

October 2019 — March 2024

★ Personal Projects

Time Tracking web application

A full-stack time tracking web app designed to improve productivity. Developed using Next.js, TypeScript, SCSS, and MongoDB. Hosted at https://timetrackweekly.vercel.app/ and source code available at https://github.com/murad-sh/time-tracking-web-app.

Study Stream web application

Study Stream, a web-based school journal platform, developed during my university studies. My role involved front-end development, using TypeScript, React, and Tailwind CSS. Source code available at https://github.com/murad-sh/school-journal-web-app.

Genetic Algorithm for TSP (Traveling Salesman Problem) in Java

Implemented a Genetic Algorithm to optimize solutions for the Traveling Salesman Problem (TSP).

https://github.com/murad-sh/genetic-algorithm-tsp

👥 Internships

Frontend Developer at IIZI LTD, Baku

August 2023 — September 2023

Responsibilities included building responsive UI components to improve user experience, working with React, JavaScript, TypeScript, and CSS modules.
